Bogdan Maksimović

Hi, my name is Bogdan, and I'm **frontend web developer**. Every day, I'm looking for ways to improve my knowledge in order to write a clean and sustainable code. My motto is: Choose the job you love and you not have to work any day in your life. I am motivated, I want to learn and improve my knowledge as well as to apply the existing ones that I have gained so far at the IT academy and self-study through Udemy online courses. My next goals are master Javascript ES6 and ReactJS.

Information

Date of birth: 15.04.1991.
Address: Karla Lukača 13, Beograd
Phone: 065/45-95-490
Education: **IT Academy,Belgrade** (2017-2018)
Email: bogdanmaksimovic91@gmail.com
Portfolio: http://bogdanmaksimovic.co.nf/
GitHub: https://github.com/BogdanMaximovic - Look at my projects.

Experience

Softmetrix (2018-present)
FrontEnd internship - On internship I learned to work in team, we develop desktop and mobile applications. Besides perfecting my skills such as JavaScript, Bootstrap,MySql, JQuery, I learned new skills such as Express.js and Embedded JavaScript. I've mastered my personal skills such as team work, job delegation, responsibility. I improved access to tasks and troubleshooting.

Skills

+ English language
Excellent understanding, written and verbal communication skills.

+ HTML 5
Creating HTML structure of the web page, inserting links, videos and pictures, working with HTML5 semantic elements, converting designs to HTML pages.

+ CSS 3
Changing style, color and position of HTML elements, working with animations, working with flexbox and css grid, mobile first approach, BEM methodology.

+ JavaScript
Data types, variables, functions, loops, If/Else statements, arrays and array methods, operators, algorithms, manipulating with DOM, objects,concepts of asynchronous programming. I use ES6 features.

+ Bootstrap 4
Using Bootstrap 4. I use grid system, bootstrap components and classes.

+ SASS
Using Scss syntax. Using variables and mixings, using nesting to target specific elements, structuring project in separate modules.

+ JQuery
Manipulating with DOM, manipulating with CSS, working with events, effects and animations, using AJAX to send/recive data from server.

+ MySQL
Working with MySQL database. I plan, writing query, create, update/delete databases and tables, make join with multiple tables with foreign keys.

+ Express.js
Working with Express.js framework. Create routing, conection on databases, write middleware. Using Nodemon for tracking changes file and automatically restarting the node application.

+ Other
Working with Git and using SourceTree for tracking code and work in team. Using NPM packages. Work in Express.js enviroment. I also use other JavaScript libraries such as EJS and DataTables. I have basic knowledge of PHP.
